

checklist for tiled and pitched roofs

	customer address	project location	
name			
street			
city			
phone			
email			

building/location data		roof pitch degree			height of roof m		
building width (pediment) m			building length m			terrain height m	
wind load kN/m ²		snow load kN/m ²			near to an embankment?		
height of embankment m		length of embankment m			distance to the building m		

solar panel data		quantity		panel orientation			
length mm		width mm		height mm		weight kg	

tilled roof		additional comments:
distance between the rafters cm		
roof hook		

Please sketch the planned array layout in the following grid or send us an layout plan!

A 15x15 grid of squares, each containing a smaller square, representing a 15x15 grid of points. The grid is composed of 15 rows and 15 columns, totaling 225 squares. Each square is defined by a thin black border, and the inner square is also defined by a thin black border, creating a uniform pattern of nested squares.
